

22.09. – 24.09.2021

“Genetic epilepsies and other neuronal ion channel disorders: Mechanisms and therapeutic perspectives”

Location: Universitätsklinikum Tübingen, CRONA, Hoppe-Seyler-Str. 3, 71076 Tübingen as well as virtual

Room: 210 (Hörsaal)

The international meeting on “Genetic epilepsies and other neuronal ion channel disorders: Mechanisms and therapeutic perspectives” will take place in Tübingen, Germany from 22nd – 24th September 2021. Due to COVID-19 it is also possible to participate virtually. As you can see from the [preliminary program](#), this event highlights the pathophysiological mechanisms and treatment options in ion channel disorders. International experts in epileptology, neurophysiology, genetics, gene therapy and bioinformatics will focus on current topics and future trends in their field.

Everybody is welcome to present either cases with specific, personalized treatments (see [program](#) for examples), or any other data related to the topic in the poster session.

You can register for the meeting by using the [registration form](#). We kindly ask you to return the signed [Confidentiality Agreement](#) together with your registration.

Please book accommodation yourself. Attached to the registration form is a list of hotels that may still have capacities. Those who participate virtually will receive the link prior to the meeting.

We are looking forward to exciting discussions, a lively exchange and a stimulating meeting.

Please send all information/correspondence to sekretariatNE5.HL@med.uni-tuebingen.de .

Please spread the program where you deem it appropriate and encourage young people to come and present either posters in the Poster Session on Thursday or oral case reports at the Molecular Therapeutic Board.

With best regards

Holger Lerche and Ulrike Hedrich
