

Neurobiological Monday Colloquium

Hertie Institute for Clinical Brain Research, Otfried-Müller-Str. 27, room 2.310, 6 p.m.

PROGRAM winter term 2018 / 19

-
- 15.10.2018 Friedemann Müller Neurologie, Physikalische Therapie und Rehabilitationswesen, Schön Klinik Bad Aibling
Robot-assisted neurorehabilitation — clinical needs, current experiences and open questions
Host: Winfried Ilg
- 22.10.2018 Alexander Groh Institute of Physiology and Pathophysiology, University of Heidelberg
Synaptic interactions in the thalamocortical system during sensory processing and behavior
Host: Cornelius Schwarz
- 29.10.2018 Greg Schwartz Departments of Ophthalmology and Physiology, Northwestern University, Chicago
New functions for electrical synapses in the retina
Host: Thomas Euler
- 19.11.2018 Asli Demirtas-Tatlidede Behav. Neurology & Movement Disorders Unit, Dept. Neurology, Istanbul University
Repetitive transcranial magnetic stimulation in neuropsychiatric disorders: Have we come a long way?
Host: Uwe Ilg
- 03.12.2018 Thomas Elston Institut für Neurobiologie, Tierphysiologie, Universität Tübingen
Adaptive motivational signals in the anterior cingulate cortex and ventral tegmental area
Host: Uwe Ilg
- 17.12.2018 Fabrice Arcizet Institut de la Vision, Paris
Cortical and sub-cortical neuronal correlates of spatial attention
Host: Amarender Bogadhi
- 14.01.2019 Sam Gilbert Institute of Cognitive Neuroscience, Division of Psychology & Language Sciences, UCL
Optimal use of reminders: Metacognition, effort, and cognitive offloading
Host: Chiara Brozzo
- 28.01.2019 Alessio Fracasso Centre for Cognitive Neuroimaging, University of Glasgow
Eye movement kinematics in human neocortex, a 7T approach
Host: Antimo Buonocore
- 04.02.2019 Sandra Blaess Institute of Reconstructive Neurobiology, Life & Brain Center, University of Bonn
Developmental mechanisms that establish neuronal diversity in the dopaminergic system
Host: Ingrid Ehrlich
